International Journal of
Food Microbiology 27 (1995) 269–271

International Journal of Food Microbiology

Contents of Volume 27

Number 1, September 1995

Review Paper

D.F. Giménez and J.A. Giméneyz (Argentina)
The typing of botulinal neurotoxins 1

Regular Papers

K.S. Cudjoe, T. Hagtvedt and R. Dainty (Norway)
Immunomagnetic separation of *Salmonella* from foods and their detection using immunomagnetic particle (IMP)-ELISA 11

O. Alexandrou, C. De W. Blackburn and M.R. Adams (UK)
Capacitance measurement to assess acid-induced injury to *Salmonella enteritidis* PT4 27

V. Sanchis, M. Abadias, L. Oncins, N. Sala, I. Viñas and R. Canela (Spain)
Fumonisins B_1 and B_2 and toxigenic *Fusarium* strains in feeds from the Spanish market 37

T.F. Brocklehurst, G.A. Mitchell, Y.P. Ridge, R. Seale and A.C. Smith (UK)
The effect of transient temperatures on the growth of *Salmonella typhimurium* LT2 in gelatin gel 45

J. Baranyi, T.P. Robinson, A. Kaloti and B.M. Mackey (UK)
Predicting growth of *Brochothrix thermosphacta* at changing temperature 61

M. Uyttendaele, R. Schukkink, B. Van Gemen and J. Debevere (Belgium, The Netherlands)
Development of NASBA®, a nucleic acid amplification system, for identification of *Listeria monocytogenes* and comparison to ELISA and a modified FDA method 77

Research Note

C.-a. Hwang and L.R. Beuchat (USA)
Efficacy of a lactic acid/sodium benzoate wash solution in reducing bacterial contamination of raw chicken 91

Calendar of Events 99

Number 2, 3, October 1995

Regular Papers

M.C. Manca de Nadra and A.M. Strasser de Saad (Argentina)
Polysaccharide production by *Pediococcus pentosaceus* from wine 101

D.W. Schaffner (USA)
The application of the WLF equation to predict lag time as a function of temperature for three psychrotrophic bacteria 107

I.R. Grant and M.F. Patterson (UK)
Combined effect of gamma radiation and heating on the destruction of *Listeria monocytogenes* and *Salmonella typhimurium* in cook-chill roast beef and gravy 117

P. Bouvrette and J.H.T. Luong (Canada)
Development of a flow injection analysis (FIA) immunosensor for the detection of *Escherichia coli* 129

M.L. Delignette-Muller, L. Rosso and J.P. Flandrois (France)
Accuracy of microbial growth predictions with square root and polynomial models 139

P. Pless and R. Reissbrodt (Austria, Germany)
Improvement of *Salmonella* detection on motility enrichment media by ferrioxamine E-supplementation of pre-enrichment culture 147

F.M. Wu and P.M. Muriana (USA)
Genomic subtraction in combination with PCR for enrichment of *Listeria monocytogenes*-specific sequences 161

J. Dufrenne, M. Bijwaard, M. Te Giffel, R. Beumer and S. Notermans (The Netherlands)
Characteristics of some psychrotrophic *Bacillus cereus* isolates 175

G.H. Weenk, J.A. Van den Brink, C.B. Struijk and D.A.A. Mossel (The Netherlands)
Modified methods for the enumeration of spores of mesophilic *Clostridium* species in dried foods 185

P.J. Blanc, J.P. Laussac, J. Le Bars, P. Le Bars, M.O. Loret, A. Pareilleux, D. Prome, J.C. Prome, A.L. Santerre and G. Goma (France)
Characterization of monascidin A from *Monascus* as citrinin 201

J. Bello and M.A. Sanchez-Fuertes (Spain)
Application of a mathematical model to describe the behaviour of the *Lactobacillus* spp. during the ripening of a Spanish dry fermented sausage (Chorizo) 215

M.G. El-Ziney, H. De Meyer and J.M. Debevere (Belgium)
Kinetics of interactions of lactic acid, pH and atmosphere on the growth and survival of *Yersinia enterocolitica* IP 383 O:9 at 4°C 229

Short Communications

K. O'Donoghue, K. Bowker, J. McLauchlin, D.S. Reeves, P.M. Bennett and A.P. MacGowan (UK)
Typing of *Listeria monocytogenes* by random amplified polymorphic DNA (RAPD) analysis 245

B. Bianchi-Salvadori, P. Camaschella and S. Cislaghi (Italy)
Rapid enzymatic method for biotyping and control of lactic acid bacteria used in the production of yogurt and some cheeses * 253

Letter to the Editor

M.R. Adams and P. Marteau (France, UK)
On the safety of lactic acid bacteria from food 263

Calendar of Events 265

Contents of Volume 27 269
